

INFYTQ:

Infytq provides 3 profile :

1. **System Engineer (3.5 Lac approx)**
2. **System Engineer Specialist (5 lac approx)**
3. **Power Programmer (8 lac approx)**

Infytq consist of 3 assessment rounds :

1. **MCQ**
2. **Coding Round with some MCQs** (if qualified in 1st round)
 - a. **Technical + HR Interview** (if scored 65% + in 2nd round)
If passed the interview then you get the SE profile (3.5 Lac)
3. **Advance Coding Round** (upgrade, only those can give who have passed the interview in the 2nd round that is 2.a)
 - a. **Technical + HR Interview for SES or PP** (if you have good scores in 3rd round then SES/PP profile interview according to scores)

1st assessment round consists of 40 MCQs:

Section I	Java/ Python	20
Section II	Database Management System	10
Section III	Aptitude	10

Section 1:

Generally, consist of output based question related to OOPs, Encapsulations, Objects, Inheritance, Time complexity, debugging etc

Section 2:

Generally, consist of multiple tables of SQL and you have to select the correct query command to perform a particular task

Section 3:

Aptitude questions of easy - normal difficulty level.

2nd assessment round:

Section I	Java/ Python* hands-on (Code)	2
Section II	Java/ Python* Multiple Choice Questions	10
Section III	Database Management Systems	10

Section 1:

2 easy coding question: one will be easier and 2nd will be an easy-medium (you can choose only Python or Java for this)

Section 2:

Similar question as in 1st round but with better quality

Section 3:

Similar question as in 1st round with better quality

If scored 65% + in the above round, you will proceed to a technical + HR interview (this can be singly combined or different)

Interview Round:

Asks normal/ easy coding question followed by basic concepts of OOPS, Database, networking,
Explanation of Project and questions from it, and other things which are written in resume etc.

If qualified in this interview you will get System Engineer Profile (3.5 lac) and will become eligible for the upgrade round.

3rd Assessment :

A coding Round of 3 hours with 3 coding questions with varying difficulty level. 1 easy, 1 medium, and 1 medium - hard (It also depends on the questions set which you get).

You can choose any language for programming in this round i.e C/C++/Python/Java/..... etc

If you have good scores you may get PP / SES profile interview call/mail.

Interview Round :

For PP: Asks a standard/normal coding question followed by questions related to time complexities, basic data structures, OOPs, DBMS, Networking, OS, Questions from Resume, Project explanation etc.

If you got the PP interview and not qualified for it then you may get an SES profile (5 Lac)

And if you got the SES interview and not qualified then you will remain in SE profile (3.5 Lac)

For more information, you can visit the official Infosys/Infytq site.

The above data is according to the 2021 batch, there may be some or no changes in the infytq format

ps: For any interview, It also depends on the Interviewer, they may ask more questions in which they have skills and interests and may skip any of the relevant topics. Sometimes it also depends on luck so never lose hope and always be prepared and confident and you will be in a deserving place (sooner or in some time).

Thank you
